**Sending Children Back To School With A Healthy Smile**

Oklahoma dentists to provide free dental screenings to elementary school children September 8 - 12, 2014.

Oklahoma Dental Association's (ODA) 2nd annual Back to School with a Healthy Smile program will provide Oklahoma children with the opportunity to receive free dental screenings throughout the week of September 8 - 12, 2014. Since more than 51 million school hours are lost each year because of dental-related illnesses, early detection of tooth decay is vital. Left untreated, dental decay can cause pain, problems with eating and sleeping, and prevent children from focusing in school.

Oklahoma dentists will volunteer their time to provide free screenings to elementary school children throughout the week of September 8-12. Each dentist will establish his/her own schedule which can be found on the ODA's website at [www.okda.org](http://www.okda.org).

"I believe children with a healthy smile do better in school and in life," said Dr. Jamie Belknap of Norman Smile Center in Norman, Okla. "Back to School with a Healthy Smile is a wonderful opportunity for elementary children to receive a FREE smile check-up close to home and begin a new school year on the right track. ODA dentists and staff

love seeing these kids - this is a special, fun time for all involved."

Although a Back to School with a Healthy Smile dental screening is not a dental exam and doesn't include a professional dental cleaning by a dental hygienist, it does provide an opportunity for parents to evaluate their child's brushing habits and overall oral hygiene. This is important because unlike other diseases, dental decay can be 100 percent preventable with proper oral health care.
